

**REMARKS**

This correspondence is to correct the inconsistency between the specification and the drawings. Specially, descriptions of Figure 10 and 11 were absent from the "Description of the Figures" section (although Figure 10 & 11 were originally filed). Consequently, this amendment does not constitute new matter.

**CONCLUSION**

The Applicants believe that the specification amendments set forth above meet the Examiner's request and, therefore, should place the application in condition for issue. Should the Examiner believe that a telephone interview would aid in the prosecution of this application, the Applicants encourage the Examiner to call the undersigned collect at 617.984.0616.
